

EMERGING SECURITY

EMERGING TECHNOLOGY

Emerging technology covers a broad array of topics from regulating drones to tackling drugs, as well as investigating converging technologies and industries.

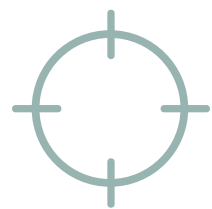

CYBERSECURITY

Cybersecurity involves protection of national networks, enhancing information sharing and cyber capabilities, as well as prevention, mitigating, and recovery from cyber attacks.

COUNTER-TERRORISM

Counter-terrorism focuses on threat awareness, developing counter-terrorism capabilities, enhancing relationships with allies and covering acts of terrorism.

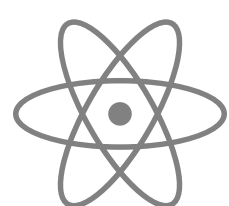

ENERGY SECURITY

Energy security addresses the protection of energy infrastructure, improving energy efficiency and awareness of energy developments relating to security issues.

NON-PROLIFERATION

Non-proliferation covers nuclear weapons and weapons of mass destruction (WMD), with topics such as arms control, disarmament, non-proliferation and defence preparedness for WMD.
